

Celtic Wreath (LO)

By Christine Manges

This wreath is one long braid that is butted. The wreath has 14 points. It is woven together in 3 passes around the wreath. The first pass makes points 3, 6, 9, and 12; the second pass makes points 1, 4, 7, 10, and 13; and the third pass does the weaving to make points 2, 5, 8, 11, and 14.

Supplies:

- 10" floral ring
- lacing cord
- felted balls (or felted flowers, or other decoration)
- needle and thread to attach decorations

Braid the following:

**Braid 8 loops counted on the right side of the braid.

Braid a Left, then a 4-over: (R, R, R, R, L)

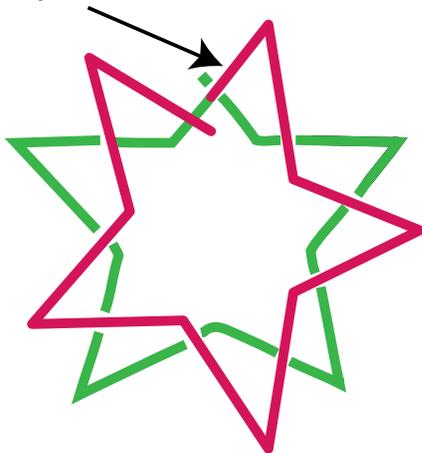

Braid 9 loops counted on the right side of the braid

Braid a double corner: (L, L, R)**

Repeat between ** until you have 14 points, plus enough overlap to butt the braid later.

Weave braid, following diagrams.

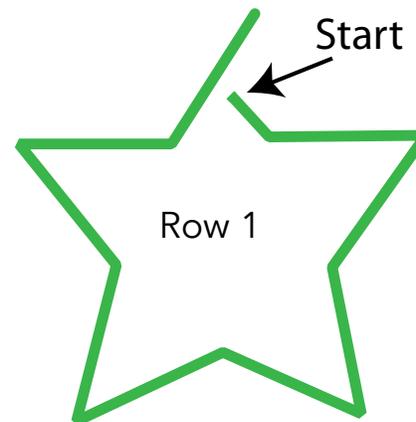

Row 2 (Red) starts here and lays over top of Row 1.

Butt the Start and Finish together

Lacing: Lay the wreath wrong-side-up and center the 10" ring on top of it. I laced the ring then 2 loops down and 2 loops up in a shallow V found directly below each outer point.

Embellish as desired.

Row 3 (Black) goes over red, under green, over red, under green, etc.
